Journal of Mechanical Working Technology, 17 (1988) vii–x
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

CONTENTS

Section 1. Computer Integrated Manufacturing (CIM)/Expert Systems

Keynote Paper
CIM systems integration — Problems and trends
M.E. Merchant (Cincinnati, OH, U.S.A.) 1
Inspection and evaluation of cams using CAD systems
T.S.R. Murthy (Bangalore, India) 11
MiCAPP: A microcomputer-based process planning system
S.H. Bok and A.Y.C. Nee (Singapore) 21
Artificial intelligence for process selection
T. Lenau and L. Alting (Lyngby, Denmark) 33
Development of an expert system for machinability data selection
S.H. Yeo, M. Rahman (Singapore) and V.C. Venkatesh
(Cookeville, TN, U.S.A.) 51
Integration of component design with tool engineering using artificial intelligence and CAD techniques
B.S. Lim (Singapore) 61
Using expert system tools and techniques in computer-aided design — An electrical switchboard design example
H.K. Ho, C.H. Tan and F.T.L. Tay (Singapore) 73
Implementation of a knowledge-based automated design system: Design of composite space-frame structures
M.Y. Teo (Singapore) and M.K. Tse (Cambridge, MA, U.S.A.) 83

Section 2. Metal Forming

Keynote Paper
Energy flow, energy losses and efficiency of the hydraulic press system
H.W. Wagener and K.J. Pahl (Kassel, F.R.G.) 93
Friction-actuated blank holding in deep drawing
S. Thiruvarudchelvan (Singapore) and W.G. Lewis (St. Augustine, Trinidad, West Indies) 103
Some uses of n_a and K_a in prediction of cold extrusion forces of sintered powder metallurgical preforms
P. Venugopal and S. Venkatraman (Madras, India) 113

Section 3. Machining

Keynote Paper
Material development and its role in advanced machining situations
H. Chandrasekaran (Stockholm, Sweden) 119

Applying design of experiments and optimization techniques to Gilbert's high efficiency machining range
E.H.T. Wee (Singapore), V.C. Venkatesh (Cookeville, TN, U.S.A.) and
T.N. Goh (Singapore) 137
Lapping and frictional properties of diamond, and characteristics of diamond cutting tool
K. Uegami, K. Tamamura and K.K. Jang (Osaka, Japan) 147
Grinding mechanism investigation based on winning and evaluation of the chip roots
J. Buda and J. Liptak (Kosice, Czechoslovakia) 157
Extension of computerised machining data banks with application packages
C. Ravichandran and G. Sudheendra (Bangalore, India) 167
Flank wear of CBN cutting tools of various compositions
S. Enomoto, M. Kato (Chiba, Japan) and S. Miyazawa (Tsukuba, Japan) 177
Whirling action of drill at the beginning of cutting
M. Kato, S. Enomoto, Y. Saito and T. Hanaoka (Chiba, Japan) 187
Machinability characteristics of fibre-reinforced plastics composites
G. Santhanakrishnan, R. Krishnamurthy and S.K. Malhotra (Madras, India) 195
Effects of tool fracture on machining force dynamics
L.C. Lee, K.S. Lee and K.G. Kwok (Singapore) 205
The chip control factor in machinability assessment: Recent trends
I.S. Jawahir (Wollongong, Australia) 213

Section 4. Machine Tools/Numerical Control

Keynote Paper
The development of high precision CNC machine tools
P.A. McKeown (Cranfield, Great Britain) 225
Production advantages of GD&T and inseparable assemblies
J.E. Freckleton (Rochester, NY, U.S.A.) 237
Computational geometry algorithms for NC — The linear tool path case
K.T. Yap (Singapore) 247
A study on the importance of dynamic rigidity in step turning
M. Rahman, K.H. Chua, K.H.W. Seah and K.S. Lee (Singapore) 257
New impact excitation method with force monitoring process for investigation of nonlinear dynamic behavior of machine tools
H. Kato and Y. Nakano (Chiba, Japan) 267

Section 5. Non-conventional Machining

Keynote Paper
How to speed up tool design and tool manufacture for production flexibility
B.M. Schumacher (Losone, Switzerland) 277
Application of FEM to anodic smoothing
G. Prabhakara Rao, O.V. Krishnaiah Chetty and R. Narayan (Madras, India) 289
Numerical calculation of shapes machined with pulsed YAG laser
T. Watanabe, Y. Yoshida (Chiba, Japan) and H. Sato (Tokyo, Japan) 297
Precision surface finish by new blasting process with grit recovery system
S. Ooba, Y. Saito and T. Hanaoka (Chiba, Japan) 307
Effect of grain size on ECM performance
K.P. Rajurkar and M.S. Hewidy (Lincoln, NE, U.S.A.) 315
Abrasive jet machining of glass at low temperature
M.K. Muju (Kanpur, India) and A.K. Pathak (Ranchi, India) 325
Hybrid machining of hard and brittle materials
S. Koshimizu and I. Iansaki (Yokohama, Japan) 333

Section 6. Grinding

Keynote Paper
The importance of temperature in grinding
M.C. Shaw (Tempe, AZ, U.S.A.) 343
Effects of static stiffness of surface grinding machine and grinding conditions upon the surface characteristics of advanced ceramic
A. Yui (Yokohama, Japan), T. Watanabe, Y. Yoshida (Chiba, Japan) and H. Sato (Tokyo, Japan) 357
Minute vibrations in precision surface grinding — Their causes and suppression
S.K. Low, Y. Nakano and H. Kato (Chiba, Japan) 367
Effects of mounting elements of surface grinding machines upon their relative receptances between grinding wheel and work table
K. Yoshida, H. Shimura, H. Yahagi and J. Yoshioka (Tokyo, Japan) 377
On the new type variable stiffness surface grinding machine
K. Sato, Y. Sakai (Sagamihara, Japan) and Y. Nakano (Chiba, Japan) 387

Section 7. Manufacturing Management

A computer aided technique for optimal scheduling
H. Bera and R. Gill (London, Great Britain) 397
IKBPSS: An intelligent knowledge based production scheduling system for the manufacture of integrated circuits

Niew Bock Cheng, Lim Beng Siong and Ho Nai Choon (Singapore) 407
Optimal product mix and scheduling in a multistage G.T. based manufacturing system
P.C. Pandey (Roorkee, India), B.V. Somasekhara (Bangalore, India) and N.K. Mehta (Roorkee, India) 417
Yield optimisation in thick film manufacturing
Y.K. Foo, P. Yong, W.H. Siew and W.S. Yu (Singapore) 423
Multiple objective decision making approach towards the improvement of productivity in industry
P.S.N. Murty (Kakinada, India) and D. Chaudhuri (Madras, India) ... 433
An application of computer in machine–component grouping of group technology
S. Rajesham, S.M. Chin and F.N. Lai (Kuala Lumpur, Malaysia)..... 441

Section 8. Optimization/FMS

Keynote Paper
Integration of information and material flow in a pilot plant — Development and experiences
H.J. Warnecke, W. Dangelmaier and H. Kühnle (Stuttgart, F.R.G.) 451
Design and evaluation of a flexible manufacturing system for small prismatic components
B.S. Somashekhar, A.J. Hegde, G. Sudheendra and M.N. Murching (Bangalore, India) 479
The distributed artificial intelligence approach to flexible manufacturing systems
S.K. Sim (Singapore) 489
Control of cutting tool replacement by durability distributions
A.I. Daschenko (Moscow, U.S.S.R.) 499
Design and operation of an FL.AGV system
M. Mehdian and H. Bera (London, Great Britain) 509

Author Index 519
